

December 2010

**EU Directive 76/769/EEC (restrictions on marketing and use)
Amended by EU Directive 2006/122/EC Restricting
Perfluorooctane Sulfonates (PFOS)
Cabot Masterbatch and Compound Products**

Cabot Corporation's masterbatch and compound products include all PLASBLAK®, PLASWITE®, PLASADD®, CABELEEC® and CABOT® grades.

The PFOS Directive restricts the intentional use of PFOS substances as constituents in certain preparations, products and articles placed on the EU market above certain threshold levels:

- 0.005% by mass used as a substance or constituent of preparations,
- 0.1% by mass in semi-finished products or articles, or parts thereof,
- 1 µg/m² of coated materials or textiles, and
- additional restrictions on fire-fighting foams; photoresists or anti-reflective coatings for photolithography processes; photographic coatings applied to films, papers, or printing plates; mist suppressants for non-decorative hard chromium (VI) plating and wetting agents for use in controlled electroplating systems; and hydraulic fluids for aviation. See Directive for details.

While Cabot does not test its masterbatch and compound products for the presence of PFOS, these substances are not used in the formulations or processing operations of masterbatch and compound products, and therefore PFOS are not expected to be present in concentrations above the threshold limits.

This information is being provided as of the date hereof. Please refer to Cabot's website – www.cabot-corp.com - for any updates to this information.

PLASBLAK®, PLASWITE®, PLASADD®, CABELEEC® and CABOT® are registered trademarks of Cabot Corporation.
