

ECONOMIC UV STABILIZER MASTERBATCH

PLASADD® PE8763

PLASADD® PE8763 is a UV stabilizer masterbatch designed to improve the UV resistance of polyolefin films. It contains an efficient HALS type UV stabilizer.

This product is suitable for use in a wide range of plastics that come into contact with food. For more details regarding the food contact compliance in various European countries, please refer to the relevant Food Contact Statement that you can obtain through your usual Cabot representative.

METHOD OF ADDITION

PLASADD® PE8763 is designed for ease of dilution and homogeneous mixing and is therefore suitable for direct addition using automatic dosing units or by pre-blending.

ADDITION RATE

The addition rate strongly depends on the type of application, composition, structure and thickness of the finished product, expected life time, geographic area, etc. Should you need further information, please, contact your local Cabot representative.
