

## BLACK PEARLS® 5560

BLACK PEARLS® 5560 is the new premium performance pigment for fine-denier polyester fiber with improved color strength and blue tone.

BLACK PEARLS 5560 has a specified Fine Screen Delta P of 0.50 bar/g of pigment maximum (correlated test in polypropylene).

### Major Applications and Performance Features

BLACK PEARLS 5560 offers significant value-in-use advantages to fine-denier polyester fiber spinners and masterbatch color concentrate producers. Its higher physical cleanliness extends melt filter life by reducing plugging, and its Delta P specification ensures consistency of product cleanliness.

In addition BLACK PEARLS 5560 delivers and excellent color strength and blue tone.

### Performance Features

BLACK PEARLS 5560 provides the following competitive advantages:

- Consistency of Low Fine Screen Delta P
- Small lot-to-lot variability within the quality specification
- Delta P performance specified below 0.50 bar/g of pigment
- Increase spin-pack life and Central Polymer Filtration System
- Reduced fiber breakages per ton

### Typical Applications

- Fine denier-polyester fiber where extremely high color performance is required

BLACK PEARLS 5560 is available in pelleted form.
